📇 PROFILE

Highly motivated Senior Level DevOps Engineer with 4+ year of experience in developing and implementing CI/CD pipelines, optimizing application performance, and automating system administration tasks. Skilled in cloud-based infrastructure design, security best practices, and system capacity planning. Proven track record in reducing deployment time by 50%, increasing team productivity by 25%, and reducing operational costs by 40%.

💼 PROFESSIONAL EXPERIENCE

Digitalis ⬀
DevOps Engineer
01/2022 – 05/2023

- Developed and implemented a CI/CD pipeline for a new application, reducing deployment time by 50% and increasing team productivity by 25%.
- Collaborated with development teams to optimize application performance, resulting in a 15% increase in user satisfaction and a 10% increase in revenue.
- Maintained system documentation and provided training to new team members, improving onboarding time by 30%.

Sogeti ⬀
DevOps Engineer
10/2020 – 12/2021

- Developed and maintained scripts to automate system administration tasks, reducing manual workload by 50% and increasing team efficiency by 20%.
- Implemented security best practices and conducted regular vulnerability assessments, ensuring system integrity and compliance with industry standards.
- Researched and evaluated new technologies to improve system performance, resulting in a 10% reduction in system response time and a 5% increase in overall system efficiency.

Pixels Trade ⬀
Software Engineer
12/2019 – 09/2020

- Developed 26 web apps for multiple clients, providing a wide range of functionality and tools enabling mission-critical processes.
- Provided priority one customer support for incidents and bug fixes, maintaining a 99% SLA for response and resolution times.
- Implemented dependency injection for over 200 modules in C# and Angular code.
- Led 17 successful (on schedule and budget) agile development projects for clients.

- CI/CD pipeline development and implementation

- Security best practices and vulnerability assessments

- Cloud-based infrastructure design and implementation

- Application performance optimization

- System monitoring and log analysis

- System documentation and training

- Capacity planning and performance tuning

- Research and evaluation of new technologies

- Script development and automation

- Collaboration and communication with development teams

Digitalya ⤢
Full Stack Developer
10/2018 – 12/2019

- Increased company revenue by 30% within 2 months after developing and implementing business logic for over 20 features.
- Designed and Developed UI design for over 15 clients using CSS, HTML, ASP.NET, Vue, and React, Websites scoring over 85 on Lighthouse.
- Created endpoints to handle results, which improved the accuracy and upload speed of each result by at least 50%.
- Managed 100+ client accounts and received 95% satisfaction.

🗎 CERTIFICATES

- Azure Devops Engineer Expert

- Docker Certified Associate (DCA)

- PMI'S Project Management Professional.

- Redhat Certified Engineer.
